## **DETAILED ACTION**

### ***Claim Rejections - 35 USC § 112***

The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

Claims 8, 11-13 and 22 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

Claims 8 and 22 contain the trademark/trade name "GRH40". Where a trademark or trade name is used in a claim as a limitation to identify or describe a particular material or product, the claim does not comply with the requirements of 35 U.S.C. 112, second paragraph. See *Ex parte Simpson*, 218 USPQ 1020 (Bd. App. 1982). The claim scope is uncertain since the trademark or trade name cannot be used properly to identify any particular material or product. A trademark or trade name is used to identify a source of goods, and not the goods themselves. Thus, a trademark or trade name does not identify or describe the goods associated with the trademark or trade name. In the present case, the trademark/trade name is used to identify/describe nonionic surfactant and, accordingly, the identification/description is indefinite.

Claims 11-13 recite patent numbers (i.e. '415), which is improper and should be deleted and the add the subject matter that the patent is claiming to the present claims provided that there is sufficient support for the amendment in the specification.

### ***Claim Rejections - 35 USC § 102***

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 1, 10-13, 15 and 25 are rejected under 35 U.S.C. 102(b) as being anticipated by Arndt (US Patent 4,983,415).

Arndt teach an inkless method of recording an image of a desired object or symbol such as the print of a person's finger is described in which a recording surface is prepared by placing thereon a thermosensitive color-developing layer comprising a chromogenic dye such as leuco dye, and organic acid developer. A chemical reagent containing one or more metallic salts is applied to the recording where the reagent reacts with the developer and/or dye (abstract and col. 2 lines 40-63). The further discloses that a surfactant (i.e. Dowfax 2A-1) may be used as a reagent (col. 3 lines 34-37). The chemical reagent may be applied to the recording surface containing the thermosensitive color-developing layer by impact printing techniques (i.e. stamp or non-impact printing techniques (col. 4 lines 41-53). The composition as taught by Arndt appears to anticipate the claimed invention.

***Allowable Subject Matter***

Claims 2-9, 14, 16-24, 26-30 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

Art Unit: 1755

Claims 8 and 22 would be allowable if rewritten to overcome the rejection(s) under 35 U.S.C. 112, second paragraph, set forth in this Office action and to include all of the limitations of the base claim and any intervening claims.

The following is a statement of reasons for the indication of allowable subject matter: The references alone or in combination fail to teach the a nonionic surfactant In view of the rest of the claim limitations.

### ***Conclusion***

The remaining references listed on forms 892 and 1449 have been reviewed by the Examiner and are considered to be cumulative to or less material than the prior art references relied upon in the above rejections.
